There are three primary benefits to ultrasound.

- 1. The first is the speeding up of the healing process from the increase in blood flow in the treated area.
 - 2. The second is the decrease in pain from the reduction of swelling and edema.
- 3. The third is the gentle massage of muscles tendons and/ or ligaments in the treated area because no strain is added and any scar tissue is softened.

This technology is available at both TRP Physiotherapy Fairfield and number 1 fitness at Smithfied.

This techniques would be suitable for back and neck injuries, workcover injuries, CTP and whiplash claims and many others.
